DHARMASOTHU VASANTH NAYAK RATHOD

dharmasothvasanthnayak@gmail.com — +91 7396116401 — Bojervu Village, Chennaraopet Mandal, Warangal Dist., Telangana – 506332

PROFESSIONAL PROFILE

Currently pursuing a B.Tech in Plastic Technology at CIPET-IPT, Jaipur, affiliated with Rajasthan Technical University, Kota, with an SGPA of 8.46 in the 5th semester. Possess hands-on industrial training experience in medical device and rigid plastic packaging manufacturing, with practical exposure to injection moulding, production operations, process-parameter monitoring, quality inspection, defect identification, troubleshooting, and shop-floor coordination under GMP and SOP requirements. Have a strong foundation in polymer materials, thermoplastics and thermosets, with basic knowledge of extrusion, blow moulding, compression moulding, material testing, MFI, tensile and impact testing, and Quality Control practices. Seeking an entry-level opportunity in Quality Control, Production, Injection Moulding, or Polymer Processing where my technical knowledge and practical industrial exposure can contribute to efficient and quality-focused manufacturing.

.PROFESSIONAL EXPERIENCE

Relisys Medical Devices Ltd., Hyderabad **Jan 2023 – Dec 2023**

Production Assistant

- Supported injection moulding production activities in accordance with GMP and SOP requirements, maintaining attention to process discipline, product quality and shop-floor safety.
- Assisted with mould mounting activities, heater checks, hopper loading and material-drying activities as part of injection moulding machine preparation.
- Monitored important injection moulding process parameters including temperature, injection pressure, holding pressure, cooling time and overall moulding cycle time.
- Observed the moulding process and supported identification of common plastic-product defects such as short shots, flash, sink marks and warpage.
- Performed basic visual and dimensional inspection of moulded components to identify visible defects and dimensional variation during production.
- Supported production documentation and maintenance of production records, helping maintain traceability and accurate shop-floor information.
- Coordinated with quality and maintenance personnel whenever process, equipment or product-quality observations re-quired further attention.
- Developed practical understanding of the relationship between machine parameters, moulding conditions, product appear-ance and basic product quality.

Mold-Tek Packaging Ltd., Hyderabad **Feb 2024 – May 2024**

Supervisor Trainee

- Supported rigid plastic packaging production and routine shop-floor operations in a production-oriented manufacturing environment.
- Assisted with machine start-up and shutdown activities while observing production requirements and safe operating practices.
- Monitored cycle time and machine utilization to support smooth and continuous production activities.
- Supported identification and basic troubleshooting of production defects and process-related issues under supervision.
- Assisted in coordinating operators and communicating production requirements to maintain smooth shop-floor operations.
- Gained practical exposure to production supervision, process monitoring, operator coordination and day-to-day manufac-turing activities.

EDUCATION

Qualification	Institution	Score /Status
B.Tech in Plastic Technology	CIPET-IPT, Jaipur	Pursuing
Diploma in Plastic Technology	CIPET, Charlapalli	74.47%
S.S.C	Board of Secondary Education	8.8 CGPA

TECHNICAL KNOWLEDGE – PLASTIC TECHNOLOGY

Polymer Materials

- Good basic understanding of polymer materials, including thermoplastics and thermosets, their characteristics and common industrial applications.
- Understanding of the importance of material selection based on processing requirements and basic product-performance requirements.

Injection Moulding

- Hands-on industrial exposure to injection moulding production operations and basic machine preparation activities.
- Understanding of mould mounting, heater checks, hopper loading, material drying, machine start-up and moulding-cycle activities.
- Basic understanding of important process parameters including temperature, injection pressure, holding pressure, cooling time and cycle time.
- Familiar with the relationship between processing parameters, moulding conditions and common product-quality defects.

Other Plastic Processing Methods

- Basic exposure to extrusion, blow moulding and compression moulding processes, including their general processing principles and applications.

TECHNICAL SKILLS

- **Plastic Processing:** Injection moulding, basic extrusion, blow moulding and compression moulding.
- **Polymer Knowledge:** Thermoplastics, thermosets, polymer properties and basic material applications.
- **Quality:** Visual inspection, dimensional inspection, defect identification, process monitoring and basic QC documenta-tion.
- **Material Testing:** Basic understanding of MFI, tensile strength and impact strength.
- **Troubleshooting:** Basic identification and process-related understanding of common moulding defects.
- **Software:** MS Word, MS Excel and MS PowerPoint.

CORE STRENGTHS

- Hard-working
- Responsible
- Quick Learner
- Optimistic

LANGUAGES

Telugu **Hindi** **English**

PERSONAL INFORMATION

Date of Birth	:	19 August 2003
Father's Name	:	Dharmasothu Dasru Nayak
Nationality	:	Indian
Hobbies & Interests	:	Travelling, Listening to Music, Gaming.

DECLARATION

I solemnly declare that all the information furnished above is true to the best of my knowledge and belief.
